Our Ref.: VOY-025US

Dear Mr. Tsatsanis:

Further to our letter of August 5, 2005 and your letter of June 22, 2005, we have also carefully reviewed your letter and studied the material that you enclosed with respect to the above identified patent application and we have drafted amended claims. A copy of a preliminary amendment is enclosed that includes the claims, as amended. You will find these to include claims 43 and 44, which are similar to the claim 1 you have reviewed, with additional language added. Claims 1-42 relate to another concept. We propose to file this preliminary amendment along with any formal papers you may execute for this application, which are also enclosed. With these we intend to file an Information Disclosure Statement (IDS) in which we will identify for the examiner the references that you have brought to our attention and any further references you bring to our attention pursuant to the inventor's obligations of which you have indicated you are aware. A complete copy of the patent application, including the specification, claims and drawings, along with the first preliminary amendment, as filed, plus a copy of the above mentioned preliminary amendment that will be filed setting forth the amended claims, are enclosed for your reference. We think we are entitled to the claims as amended over the prior art as represented by these references. Nonetheless, the examiner, having been provided with the identity of these references, will be in a position to determine the patentability of the claims.

The enclosures include the application as filed based on the PCT application and the two preliminary amendments. For your convenience, we are providing an "application as amended", in which we have combined the application as filed with the amendments, replacing the original pages and claims of the PCT application with the new pages and claims from the preliminary amendments. This "application as amended" contains the subject matter to which the Declaration relates that you are being asked to sign.

A Declaration and an Assignment are enclosed. After reviewing the enclosed copies of the application papers, please execute these and return them to us for filing in this application, which we will do along with the preliminary amendment of the claims and the IDS. If we do not receive the signed Declaration from you by August 25, 2005, we would proceed with this application in the absence of your signature under 37 C.F.R. §1.47, and we will file a petition as provided by that rule when an inventor refuses to sign a Declaration. But we do not believe that will be necessary, as we trust you will find the application and related papers that are enclosed acceptable and will return the signed Declaration and Assignment. If you have any further comments, we will consider them.

Please let me know if you have any questions.

Very truly yours,

A handwritten signature in black ink, appearing to be 'JR Jordan', with a long horizontal line extending to the right.
